YASH RAJU GAIKWAD

Full-Stack Engineering • UI/UX Architecture

Navi Mumbai, Maharashtra • +91 9082882412 • yashgaikwad0450@gmail.com

Portfolio: y16workspace.vercel.app • **LinkedIn:** linkedin.com/in/yash-gaikwad-a0969833b • **GitHub:** github.com/YGCodeScape

PROFESSIONAL SUMMARY

Results driven Full Stack Software Engineer experienced in architecting scalable web applications, responsive user interfaces, and low-latency RESTful APIs using the MERN and Next.js ecosystems. Proven track record in SaaS performance optimization, reducing API latency by **40%** and cutting page load times by **30%**. Creator of **10+ public repositories** and **6+ deployed production web apps** all centrally showcased with interactive live demos and source code at **y16workspace.vercel.app**.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, SQL, PHP, HTML5, CSS3
Frontend:	React.js(19), Next.js, Redux, Zustand, Tailwind CSS, Framer Motion, GSAP, Vite
Backend:	Node.js, Express.js, RESTful APIs, Microservices Architecture, Socket.io, Supabase, API Security
Database & CS:	MySQL, PostgreSQL, MongoDB, Database Indexing & Query Optimization, DSA, OOP
Tools:	Git, GitHub, CI/CD Automation, Postman, Vercel, Figma, VS Code

EDUCATION

Bachelor of Computer Applications (BCA) — **CGPA: 8.4 / 10.0**

Tilak Maharashtra Vidyapeeth, Pune — Completed: May 2026

PROFESSIONAL EXPERIENCE

Full-Stack Development Intern • Palcoa Solutions — **Jan 2026 – Mar 2026**

- Delivered **3 end-to-end frontend modules** for a SaaS salon management platform using **React.js** and **Tailwind CSS**, improving page-load performance by **30%** via component modularization and code-split lazy loading.
- Refactored **PHP** backend request handling and optimized **MySQL** query execution plans with targeted indexing, reducing API response latency by **40%** and eliminating recurring N+1 query bottlenecks.
- Engineered and documented **2 reusable workflow automation modules** adopted across development teams to standardize CI/CD integrations and accelerate feature deployment cycles.

PROJECTS & PRODUCTION PORTFOLIO

Y16 Workspace – Interactive Portfolio & All-Projects Hub — **Live Hub • https://y16workspace.vercel.app/**

Technologies: Next.js 16, React 19, TypeScript, Tailwind CSS v4, Framer Motion, GSAP

- Engineered a high-precision interactive portfolio featuring a tactile swipe/hover canvas grid, custom spring physics, and sub-second UI feedback as the **central live hub for all 10+ repositories and 6+ production web deployments**.
- Houses complete live demos, architectures, and GitHub source links for all additional deployed projects not listed below.

Yemo Cafes – Contactless Table-Ordering & Hospitality Workflow Platform — **Live Platform • https://sizzlitweb.netlify.app/**

Technologies: Next.js 16, React.js, TypeScript, Zustand, Tailwind CSS, Framer Motion

- Architected an interactive digital dining and contactless table-ordering web application, that digitizes the in-store café experience from QR table scanning to checkout.
- Crafted a responsive, mobile first interface using **Next.js 16**, **TypeScript**, **Tailwind CSS**, and **Framer Motion**, delivering fluid micro interactions and fast page transitions across mobile devices.

CommitYou – AI Git Commit Message Generator — **Live Demo • https://commit-you.vercel.app/**

Technologies: Next.js, TypeScript, Tailwind CSS, Google Gemini AI, Server API Routes, Vercel

- Built and deployed an open-source AI developer tool that analyses git diff outputs and generates contextual commit messages across Conventional, Friendly Emoji, and Simple formats.
- Integrated Google Gemini AI via a secure server-side Next.js API route, keeping API credentials protected and preventing client-side exposure.
- Implemented multiple commit style presets, strict input validation, character-limit enforcement, and one-click clipboard copying.

Complete Authentication System — **GitHub Repo • github.com/YGCodeScape/Complete-Authentication-System**

Technologies: Node.js, Express.js, MySQL, JWT (Access & Refresh Tokens), RESTful APIs, Bcrypt, Nodemailer

- Architected a production-ready, standalone backend authentication service found at Complete-Authentication-System using Node.js, Express.js, and MySQL, designed with decoupled RESTful endpoints for seamless integration with any web or mobile frontend.
- Implemented dual-token **JWT authentication (short-lived Access Tokens + Refresh Token Rotation)** with secure HttpOnly cookie handling and active session management to mitigate token replay and XSS vulnerabilities.
- Built automated **Email OTP verification** workflows, cryptographic password hashing, and custom middleware route guards to enforce strict role-based access control and request validation.
